I have successfully created a user in firestore and added to groups. I also have an auto accept function

---

that accepts new users to group. now the problem is when I add a new user through Firebase it's not auto accept it so I have to accept it manually. I want to add a list to auto accept users. i'm using firebase as a backend. not android how can i get a list of users in groups into a variable? A: You can get the entire database from Firestore by using the DocumentReference To do this you can use the Database.allDocuments() method, and in that call you can get the groups from the collection groups You can use the "find()" method of any collection of Firebase, in your case it'll be the groupsCollection, to get the documents as an array of DocumentSnapshot

```
DocumentSnapshot[] snapshotArr = groupsCollection.documentSnapshots();
```

//Now you'll have an array of DocumentSnapshot, and each one has a boolean isNew flag (new) to check if the document is new

Q: Mikado - how to prevent opening How can I keep my mikado from opening without using windows hotkeys? I'm using it to play minecraft, so it has to be easy to close. I know how to do this with good old maximus, but, I'm new to mikado

A: I think you can accomplish this by unchecking the Enable Accessibility Features box when you first start Mikado up. to the entire
