It works fine if the date isn't within the X weeks, but if it is, it stops working. N.B. This is my first attempt at nested IF, so there might be errors elsewhere in the script. If the "

What's New in the?

Adobe Flash Player After having tested several different products in the past, we can say with certainty that "Flash Player for Mac" is the best thing that has happened to the player. While the open-source version (Flash 10) is a nice addition, the new Mac version has a lot of features that make it worth using. For instance, there are lots of popular plug-ins that allow us to view things like YouTube videos, listen to music (that can be embedded in your pages) and play video games. We have just been testing Flash 10 for Mac and we have to say that it has been fully loaded. The new version offers all the things we have seen for years and more. With the new version, the Flash Player starts the player immediately after the "+" icon in the menu bar. You can click on the icon to open a list of all the sites that have videos that can be played directly on the pages you create. The embedding of Flash videos becomes easier and faster, since the player has improved significantly. If you have used Flash before, we can say that this will be a pleasant surprise. You will be able to take advantage of the new player, since Flash 11 has this new features. If you have any doubts, you can always search for tutorials that can help you out. What is new in this version: Ability to preview the selected file: While it still needs a lot of improvement, this feature is already there and can be tested. You can see the page right there, without needing to download it first. It's a big plus for this kind of player. An improved control panel: It's more comfortable to use now, thanks to the new appearance. MIME Type: When you are browsing the Internet, you have probably seen more and more short videos of different types. This is why this new option is really welcome, since it will allow you to determine what type of multimedia files you want to open. New features: The change in the name of the "Play" button: If you have some problems and you need to find the player faster, you can just press the Play button, which will make the player open. This button will be available under the Tools menu. The possibility to create a project: What if you need to edit multiple Flash files, create a Flash menu, or you need to use your computer's
