Set in NYC in 2031, we follow the story of the New Ice Age, a global event that resulted in the formation of a new elite class, the New Ice Kids, and the Frosted Revolution, an epic struggle for political power, societal change and eternal ice and snow over the streets and subways of New York City. Older and younger children have been turned into immortal warriors. The young Ice Dancers are being groomed to seize power and the world, and Ice Girl, on the other hand, works with the mighty Ice Boy to bring justice to the worst of them. Is the player true to the concept of the story or is it a work of fiction? I'm not able to be a fanboy to this due to my current profession so I was interested in your

opinion. I've been able to get to know the story of the game by playing the game and that's about it. Thanks Reviews

“Swing Shift may have a light-hearted look about it, but it’s graphically impressive, and a whole bunch of people are doing it.” 9.2/10 – Eurogamer

“Sumo Digital has certainly been busy in 2012, and is poised to top the charts of 2012 in terms of quality.” 9.2/10 – PCGN.com

“Sumo Digital’s newest epic RPG, New Ice age, is a visually stunning wonder that draws you into the world and characters. There’s nothing wrong with a franchise based on a big ball of ice, but the problem is, that’s not what you get here.” 7.5/10 – IGN

“Truly epic in scope and generous with its world-building, New Ice Age should be on everyone’s must-play list.” 90/100 – GameSpot

“New Ice Age goes beyond what I could have hoped for from an RPG of this style.” 5.0/5 – Jeuxvideo

“Sumo Digital seems to be on a

roll lately, with New Ice Age being a hot new release from the upstart British studio. A girl (or boy, depending on your perspective) trapped in a dream of eternal ice and snow... who needs anything else?" 7.0/10 – Rock, Paper, Shotgun "...summoning the power of the North to change a world.

JermaSlots in Details:

Congratulations, this one is a beautiful turn based strategy flash of battery racing game.

Gameplay is progressing into familiar positions, we have 3 races to go. Each race, you can join at anytime and if you have decided you are interested in a game, do not hesitate to join, there will be at least 2 players.

Free game is more or less unrestricted so you will be playing on basic rules, and most of the game is still intact so the learning curve is low. There is no time limit on game plays and after each game you just exit the game lobby and play again if you wish to.

What are you waiting for?

Today, we are interested in hearing your thoughts regarding the article by Professor Langsam, titled "Estonian students' satisfaction with lecturers" published in the 15th issue of The ELS Journal for 2010. As a source of satisfaction, the lecturer has taken the first place in all universities, and in the group of top 10 in universities with the highest number of bachelor degrees. It seems, that the main reason for the high satisfaction in the ELS Journal is the lecturer's style. Even the average result on the Likert scale from the ELS Journal does not reach the middle of the scale, but is much lower. If we compare it with the survey of the students' engagement at the end of the semester, we are talking about a huge discrepancy. We are all sure of the huge significance of the lecturer's presentation for the development of the students' scientific knowledge and skills. However, this is also true that the positive perception of lecturers is much higher than the perception of the university. We can raise questions about the lecturer perception by well-known lecturers when lecturers have to undergo remarkable efforts to keep up with the reputation of their subject

and direct their lectures. There are a lot of issues that
